FLORIDA HOSPITAL

Thank you for your interest in living kidney donation. Enclosed you will find some basic information regarding the evaluation process and a three-page application to complete and return. Please return the application in one of the following ways:

- Mail: FHTI Living Donor Program 2415 North Orange Avenue, Suite 700, Orlando, FL 32804
- Fax: Attn Central Intake (407) 303-0894
- Email: FHTI.Centralized.Intake@FLHosp.org

Candidates for living kidney donation must be willing to donate of their own free will and without the influence of outside pressure. There is no maximum age limit for donation but you must be at least 18 years of age. Donors must be healthy and free from chronic conditions such as heart disease, cancer, or other serious medical conditions that could place them at higher risk for surgical or long-term complications from donation. We will screen each application carefully and let you know if you meet the criteria to begin the process of evaluation.

The evaluation does require a visit to the Florida Hospital Transplant Institute to meet with the living donor team and physicians, however some testing such as the compatibility can be done by mail if you live out of the area.

The evaluation, surgery, and hospitalization for donation are covered by the recipient's insurance through the transplant center. Some age-appropriate cancer screenings may be required and unfortunately are not covered through the donation process. These would include: Pap-smear, mammogram, and colonoscopy. Travel expenses, lost wages, and lodging are also not covered by insurance and are the responsibility of the donor and recipient. The National Living Donor Assistance Center may be able to assist donors living outside the area with the cost of travel and lodging. Applications are available through the Living Donor Program.

If you are not found to be compatible with your potential recipient, we have a Paired Donation Program where we list you as a pair in two databases that help to find compatible matches for you and your recipient. The kidney donor and kidney recipient have surgery on the same day. We partner with the Alliance for Paired Donation and the Organ Procurement and Transplant Network's Kidney Paired Donation Program.

Our donor evaluations are kept confidential and not shared with your potential recipient. We do advise you to keep them informed of your progress throughout the evaluation. Once your application is processed by our Intake Coordinator, the evaluation coordinator will contact you directly to discuss the next steps. We look forward to working with you!

Sincerely,

Florida Hospital Transplant Institute
